### Filler: Revanesse Ultra

Filler is an injectable product that is used to plump out fine lines and wrinkles and to enhance the volume of lips.

The filler, **Revanesse Ultra** is a high viscosity, biodegradable, non animal-based, clear Hyaluronic Acid gel made using Prollenium's® patented cross-linking process. This process creates a thicker, longer lasting gel that improves the ability to treat deep and more pronounced lines and wrinkles such as nasolabial folds (line extending from the corners of the nose to the outside of the mouth), glabellar lines (frown lines between the eyebrows) and the enhancement of lips.

Cost: R3500 for a full ampoule

### Expression line treatments: Dysport

This effective and very popular injectable treats deep lines and wrinkles by immobilizing muscles that cause the deep expression lines on the face.

Dysport is made from botulinum toxin Type A - It works by temporarily immobilizing muscles, which reduces lines and furrows.

Dysport is injected around expression lines -- the creases caused by frowning, scowling, smiling or looking surprised -- to diminish their appearance or keep them from forming.

The use of the botulinum toxin Type A has also proven to be very successful in the treatment of hyperhidrosis: excessive sweating of underarms, palms and soles of hands and feet by injecting the sweat glands with the Dysport.

Cost R50 per unit
